

The International Linear Collider in Japan: Status and Outlook.

Satoru Yamashita (ICEPP, Univ. of Tokyo)

Tuesday, 22 November 2016, 16:45 h, DESY Auditorium

Please note:

**This seminar is embedded in the
„10th Annual Workshop of the Helmholtz Alliance `Physics at the Terascale'”**

The International Linear Collider (ILC) is a next-generation electron-positron collider at the energy frontier, designed and developed through a worldwide collaboration. The talk will review the physics potential of the ILC and focus on the recent progress of the worldwide and domestic efforts to realize the ILC project.

- . **Coffee, tea and cookies will be served at 16:25h**
- . **After the seminar there is a chance for private discussions with the speaker over wine and pretzels**
