

VIDEO Colloquium:

European Strategy for Particle Physics Update 2020.

Tuesday, 14 July, 2020

Webcast 16:45 h

Beate Heinemann (DESY and Freiburg University)

I will present the updated European strategy for particle physics which was announced by the CERN Council in June. The strategy was developed in a process that spanned two years and engaged both the European and the international community of particle physics, as well as related scientific disciplines. The highest-priority physics recommendations are the study of the Higgs boson and the exploration of the high-energy frontier: two crucial and complementary ways to address the open questions in particle physics. Questions related to the dark universe, flavor and other puzzles of the Standard Model are also discussed. Finally, technological and societal challenge and opportunities are also highlighted.

2020 UPDATE OF THE EUROPEAN STRATEGY
FOR PARTICLE PHYSICS

Please note: This is a VIDEO Colloquium!
