

How AI is raising the ambition of physicists.

Tuesday, 18 February 2025
Auditorium & Webcast 16:00 h

Kyle Cranmer (University of Wisconsin-Madison, USA)

AI is quickly raising the ambitions of scientists; however, the capabilities that AI enables varies significantly across fields. I will provide examples and describe some emerging patterns that hint at the diversity of ways that AI will transform scientific practice. In particular, I will highlight how AI/ML is advancing Simulation-Based Inference, Lattice Field Theory, and Scattering Amplitudes.
