

## Electron-Positron Linear Collider: Past, Present and Future.

Colloquium on the occasion of the 100<sup>th</sup> birthday of Prof. Dr. Willibald Jentschke.

## Nicholas J. Walker (DESY)

## Tuesday, 6<sup>th</sup> December 2011, 16:00 h DESY Auditorium

After some introductory remarks by Joachim Mnich to commemorate the founder and first Director of DESY in Hamburg, this colloquium will focus on the International Linear Collider (ILC).

With one year left of its mandate, the International Linear Collider (ILC) Global Design Effort is now preparing for the publication of the ILC Technical Design Report. At the same time the LHC is opening up the Terascale and changing the physics landscape. It is therefore a good time to look back over the now long history of the linear collider and reflect on both where we have been and where we might be going. In this lecture I will present a personal view of the now over twenty-year-old linear collider story, together with some thoughts on the still many challenges ahead to realizing the great adventure.

- Coffee, tea and cookies will be served at 15:45h
- After the seminar there is a chance for private discussions with the speaker over soft drinks and pretzels
