

Recent LHC Results from a Theory Perspective.

Sven Heinemeyer (IFCA-CSIC, Santander)

Tuesday, 15 November 2011, 16:00 h
DESY Auditorium

We discuss recent LHC results on the search for Higgs bosons and for Supersymmetry. The interpretation of these results are strongly model dependent and have to be interpreted with care in new physics scenarios.

We show the impact of the LHC searches on global SUSY fits and discuss the implications for future collider experiments.

- Coffee, tea and cookies will be served at 15:45h
- After the seminar there is a chance for private discussions with the speaker over soft drinks and pretzels
